## EXPERIENCE

For **3 months**, I did **an internship** on the development of the backend of **kun.uz**, **youtube.com** and **100k.uz**. - clones. I have been working **on-site** on a real project at **Turin Polytechnic University** since November

**applicant** | backend | by team |

- Added many **Rest APIs,** and **Some features**
- **Spring Security** (working with multiple roles)
- **Apache POI -** (used for .doc, .docx and .xsl)**,** In this, **I have automated working with various documents**

The project is still being upgraded...

**kun.uz**(clone) | backend | by myself |  link

- Fully accessible via **REST APIs**
- **Jwt token** used by **Auth service**
- **SMS service** (sms sent to phone) used with the help of **APIs** from **eskiz.uz** site
- **Gmail Service** is connected to another project which is used via **RestTemplate**, and **that** project used the **Gmail SMPT Server**
- The **problem** of waiting for mails in the **Gmail** service **solved** by **threads**

**youtube.com**(clone) | backend | by team |  link

- The **youtube** is similar to **kun.uz** however added **new technologies**, **features** also **many changes**
- **Jwt** is connected to **Spring Security**
- Added **Flyway, Swagger**
- Through **i18n**(Resource Bundle Message) feature en, uz, ru **languages** added
- **JUnit** tests added for other methods

**100k.uz**(clone) | frontend-backend | by team | link

- The site made by **HTML, CSS**(advanced)
- The backend connected via **Thymeleaf**

**Environments**: Java17, Rest services, Spring(Security, Data JPA), Postgresql, RestTemplate, Cacheable, Gmail SMPT Server, Flyway, Swagger, JUnit, i18n, HTML, CSS, Thymeleaf

## SKILLS

**Proficient** - **Java, Postgresql**, **Spring**(Boot, MVC, Security, Data), **Rest**, **Hibernate**(ORM), **JPA, JDBC**, **Jwt, Telegram Bot, Thymeleaf, HTML, CSS, Bootstrap, Git | Github**(VCS)

**Competent** - **JUnit, Docker, Windows/Linux**(solving problems)**,**

**Familiar** - **JavaScript, Python, C++**(Competitive programming), **MySQL, RabbitMQ, Microservice architecture** (Eureka Server / Client), **Deploying project**

| Tools | Design & Architecture |
|---|---|
| Maven, Git, Docker | OOP, SOLID, **Design Pattern**(familiar) |

## LANGUAGES & INTERESTS

**English** - B1, **Russian** - A2
**Uzbek** - native, **Tadjik** - native
**Problem Solving** - LeetCode, HackerRank.
**Tutoring, Volunteering**

## COURSES

09.2022-08.2023
PDP ACADEMY AND BRAIN ACADEMY
